ELECTRICAL ENGINEER

HIGHLIGHTS OF QUALIFICATIONS

- Electrical & Electronics Engineer with hands-on industrial experience in process safety, risk analysis, and safety-critical system design across Oil & Gas FEED and EPC projects.
- Delivered 60+ quantitative risk and process safety studies for major energy clients including ADNOC, Borouge, Qatar Energy, TA'ZIZ, TAQA, and ExxonMobil.
- Strong background in circuit and system analysis, consequence modelling, escalation analysis, and design-basis input for instrumentation, control, and safety systems (ESD/SIS).
- Skilled in technical simulation software, P&ID and Single Line Diagrams interpretation, and multidisciplinary coordination with electrical, instrumentation, and controls teams.
- Currently expanding skills in PLC, SCADA, HMI, and electrical design tools, with a broad interest in electrical, electronics, and controls engineering roles.
- Bilingual: Arabic (Native) and English (Professional).

TECHNICAL SKILLS

- **Electrical & Electronics Fundamentals:** Circuit analysis, industrial electrical systems, power and control system fundamentals, instrumentation and P&ID interpretation, hazardous area awareness, electrical safety, SIS/ESD concepts, system reliability.
- **Engineering Software:** PHAST, SAFETI, DNV KFX, FLARESIM, MS Office.
- **Standards & Codes:** NFPA, API, IOGP, ADNOC HSE.
- **Soft Skills:** Technical report writing, analytical thinking, problem-solving, attention to detail, cross-disciplinary coordination, communication, teamwork, adaptability, Quick Learning.

WORK EXPERIENCE

HSE Engineer (Oil & Gas / Process Safety)

Jul 2025 - Jun 2026

Velosi Asset Integrity Limited - UAE

- Delivered 60+ quantitative risk and process safety studies for Oil & Gas FEED and EPC projects - including Fire and Explosion Risk Assessment (FERA), Quantitative Risk Assessment (QRA), and CFD dispersion studies for ADNOC, Borouge, Qatar Energy, TA'ZIZ, TAQA, and ExxonMobil projects.
- Supported Emergency Shutdown (ESD) system design basis and Safety Instrumented System (SIS) risk-reduction justification through escalation analysis, hierarchy-of-controls safeguard identification, and ALARP demonstrations - work directly informing control and instrumentation safety logic.
- Performed fire, explosion, and toxic consequence modelling using engineering simulation software (PHAST, SAFETI, DNV KFX, FLARESIM), producing radiation, overpressure, and dispersion contours used as design inputs by electrical, instrumentation, and control disciplines.
- Coordinated with multidisciplinary FEED/EPC teams (process, electrical, I&C, layout) to align safety findings with system design, applying NFPA, API, IOGP, and ADNOC HSE standards.
- Authored technical reports and design-basis inputs later used by control and safety system engineers, developing strong technical writing and functional-specification documentation skills.

Asset Management Project Support

Dec 2024 - Jul 2025

Prodome Consulting - UAE

- Tagged and catalogued company assets using barcode labeling systems, ensuring accurate identification and traceability across the inventory, then entered and maintained the records in an asset management/inventory system to keep data accurate and up to date.
- Organized and classified assets into categories based on type, location, and condition to support efficient tracking and reporting.
- Compiled findings and presented the completed asset inventory to the client, summarizing categorization and system setup.

Technical Support

Aug 2024 - Dec 2024

Excellence and Success Centre - UAE

- Diagnosed and resolved hardware, software, and network issues, building practical troubleshooting skills.
- Installed, configured, and maintained systems and applications across a multi-user environment.

Software Developer (Intern)

June 2023 - Dec 2023

Comtech Ltd. - Cyprus

- Assisted in developing a mobile/software application for a GPS tracking device, contributing to the design and functionality of the product.
- Wrote and contributed code segments for core application features as part of a development team.
- Integrated the Google Maps API into the application to enable real-time location tracking and mapping functionality.

ACHIEVEMENTS

- Delivered safety engineering support across six major regional and international energy operators — including ADNOC, Qatar Energy, and ExxonMobil — adapting risk methodologies to each client's distinct technical and regulatory requirements.
- Built working proficiency across four distinct process safety simulation platforms (PHASt, SAFETI, DNV KFX, FLARESIM), enabling independent execution of fire, explosion, and dispersion modelling across varied project scopes.
- Applied and reconciled multiple international safety standards (NFPA, API, IOGP, ADNOC HSE) consistently across concurrent, multi-client projects.
- Safety recommendations and technical reports were adopted directly into client engineering documentation and downstream ESD/SIS design decisions.

EDUCATION

B.Sc. Electrical & Electronics Engineering (Honours)

Jul 2024

Eastern Mediterranean University (EMU), Cyprus

Assessed as equivalent to a Canadian four-year bachelor's degree by World Education Services (WES), Sep 2026.

CERTIFICATIONS

- Microsoft AI & ML Engineering Specialization | 2025
- IBM AI Developer Professional Certificate | 2025
